

## **Marine Asset Monitor (MAM)**

**Reliable, simple and cost-effective  
satellite tracking**

Choose MAM when you need to track and monitoring marine assets in remote locations and inhospitable environments.

MAM offers reliable position reporting, near-global coverage via the Globalstar satellite network and an integrated GPS, all housed within a tough polycarbonate enclosure.

The MAM serves as a practical solution for your goals in regard to both operating efficiency and security. Use this device to track a multitude of assets, including intermediate bulk containers, vehicles and boats

MAM is easy to install

The MAM can be line-powered, or in the absence or interruption of external power. The MAM Monitor utilizes motion sensors, comparative GPS positions and custom configured sensors to gather and transmit asset status information. Each device is configured to track its asset's specific needs and provide intermediate and emergency alerts by email or text.

## Key Benefits:

- ✓ “Fit and forget” vessel-ready terminal
- ✓ Rugged, reliable and engineered for extreme temperatures and conditions
- ✓ Requires no external antenna
- ✓ Compatible with the Mitsui platform
- ✓ Low-maintenance
- ✓ Certified intrinsically safe
- ✓ Choose from either one or six or 24

## MAM Technical Specification

OPERATING TEMPERATURE	-30 to 60 C (-22 to 140 F)  <b>NOTE: The unit shall remain operational over the -40 to 85 °C (-40 to 185 °F) range, though may experience RF signal degradation.</b>
LINE POWER	5V DC or 8-22V DC with regulator cable
CERTIFICATIONS : *SATELLITE	ANATEL Certification for Brazil (pending), FCC CFR Parts 15 and 25, Industry Canada, CE Mark (European Certification)
*STANDARDS	SAE J1455 MIL STD 810, NEMA 4X/IP68, RoHS Compliant
SATELLITE TECHNOLOGY	Global LEO Satellite operation
